

# Tushar Verma

Bachelor in Computer Science

Frontend app developer passionate about building modern and dynamic websites. I focus on creativity, problem-solving, and attention to detail to deliver projects that meet goals. B.Tech graduate with a specialization in cloud computing, having hands-on experience with AWS and GCP. As a fresher, I aim to contribute my skills to a company's success while gaining valuable real-world experience.

## College Project

Title: ServiSpot

Responsibility: Full Stack Development, Team Lead

Purpose: End term Major project, 2024

Outcome: A modern, responsive web app bringing together useful services in one place accessible through a simple user login. Ads are displayed before login to generate revenue.

Tech Stack: Html, Css, Javascript, Git and Github, Api integration, AWS, Firebase Auth, Google Analytics, Web3Forms, Figma, Monetag Ads.

See it in Action: [servispot.shop/](https://servispot.shop/)

## Personal Projects

Title: PortfolioWithReactJS

Responsibility: Frontend development

Purpose: To present myself better

Outcome: An intuitive, fully responsive website with smooth animations, showcasing personal and professional details. Created to better connect with recruiters and friends while reflecting my skills and personality as a developer.

Tech Stack: ReactJs and Tailwindcss, Gsap and Framer motion, Shadcn/ui, Javascript, Css, Html etc.

See it in Action: <https://tusharverma.vercel.app/>

Title: WorldTime Flutter App

Responsibility: Frontend development, Api integration, Build and Deployment.

Purpose: To learn Mobile App Development

Outcome: This app integrates API and updates the UI dynamically on Android and iOS devices. Users can select locations to see real-time updates with day or night backgrounds, inspired by a NetNinja tutorial.

Tech Stack: Flutter and Dart, Android studio, worldtimeapi, Git, Github, Xcode, Appetize.io

See it in Action: [https://appetize.io/app/b\\_lh74aeegtmeo7zqbszfesxrre?device=iphone14promax&osVersion=16.2](https://appetize.io/app/b_lh74aeegtmeo7zqbszfesxrre?device=iphone14promax&osVersion=16.2)

Title: The NewsBlocks

Responsibility: Frontend development, Api integration, Json data manipulation.

Purpose: To showcase my skills in Javascript and Api integration with real world example.

Outcome: It displays the latest news using the gnews Api, offering search bar and predefined categories for easy navigation. It works on all devices and is free of ads. Clean and minimal user interface to read news highlights.

Tech Stack: Html, Css, Javascript, gNews Api, Git and Github

See it in Action: <https://gitboytushar.github.io/The-NewsBlocks/>
